## **DETAILED ACTION**

### ***Response to Amendment***

Claims **1- 11, 13- 14, 21, and 23** are **cancelled**.

Claim **12** is currently **amended**.

Claim **24** is **new added** claim.

In view of the amendment, filed on 10/22/2009, following **rejections** are **withdrawn** from the previous office action, mailed on 08/18/2009, for the reason of record.

- Rejection of claims 12- 20 and 22- 23 under 35 U.S.C. 112, second paragraph
- Rejection of claims 12- 20 and 22- 23 under 35 U.S.C. 103(a) as being unpatentable over Kondo et al. (WO 01/98067) in view of Shimada et al. (WO 02/090098)

### ***Response to Arguments***

Applicant's **remarks** (filed on 10/22/2009) with respect to the allowability of the claimed subject matter in the instant application have been fully considered and **are persuasive**. Therefore, rejections of the claims 12, 15- 20, 22, and 24 have been withdrawn.

### ***Allowable Subject Matter***

Claims **12, 15- 20, 22, and 24** are **allowed**.

The following is an examiner's statement of **reasons for allowance**:

The prior arts of record **fail** to teach or suggest a compression molding method to mold a product having a core and an outer layer by an apparatus comprising an upper punch and a lower punch which are arranged in a vertical direction of a die in which both of the upper punch and the lower punch having a double structure in such a way that an outer punch surrounds the periphery of a center punch and are slid-able and capable of a compression operation; the method comprises a core supply step of supplying molding material for the core into a space defined above the lower center and outer punches, an outer layer supply step of supplying molding material for the outer layer into a space defined above and around the core, which is molded in the preceding step, until a tip of the lower center punch takes a position protruding from a tip of the lower outer punch through lowering the lower outer punch, and a whole molding step of the core and the outer layer molding material in such a way that the tips of the lower center and outer punches are aligned with each other, wherein an outer layer supply step of supplying the molding material into the space defined above the lower center punch is not performed prior to the core supply step, as claimed in **claims 12 and 24**.

The closest **prior arts of record**, Kondo et al. (WO '067) and Shimada et al. (WO '098) **fail to teach** an **outer layer supply step** into a space defined above and around the core molding performs **when** a tip of the lower center

Art Unit: 1791

punch takes a position protruding from a tip of the lower outer punch **by lowering the lower outer punch, wherein** an outer layer supply step into the space defined above the lower center punch **is not performed prior to** the core supply step. Thus, claims **12, 15- 20, 22, and 24** are **allowed**.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
